PRESIDENT MESSAGE

K M Thippeswamy

President
Sri Siddalingeshwara Education Trust (SSET)
Kudligi

Pharmacy, Nursing & Paramedical is a noble profession since the services ultimately reach the suffering humanity, either directly or indirectly. Pharmacy professionals deal with the life saving, pain relieving, problem solving substances – 'The Drugs' !.

A disease during its long journey from the lab until it is administered to the patient, passes through the hands of a pharmacy professional at various stages like discovery, synthesis or isolation and purification, testing for advantageous pharmacological effects and absence of toxicological effects, formulation development, manufacturing and testing of drugs and ultimately medication management in the hospital.

We at YSS College of Pharmacy, Nursing & Paramedical try hard to mould the budding professionals competent in knowledge and skills, powered with values, so that they can be better humans and best professionals for tomorrow.

B.Sc. / G.N.M. NURSING

Why Study Nursing?

Nursing is a lucrative course for medical aspirants. A career in nursing ensures a stable and secure future. You need to complete your 10+2 exams for Nursing eligibility requirements. You can choose to do a shorter diploma in health management or a full-fledged post-graduate degree.

Why Study B. Pharma / D.Pharma?

With outbreaks and virus pandemics continuously occurring around the world, pharmacy maintains a position of great and vital significance as a vehicle for the formulation of treatment methods and medications. Owing to this fact the pharmaceutical industries are ever growing, thus always in demand for capable human resources with the abilities and skills to navigate the industry and bring solutions to humanity. The program is integrated with medicine, thus students who get to pursue this program have a career leverage in the pharmacy sector, with prospective careers in:

- Chemical technician
- Pharmacist
- Chemists
- Drug inspector
- Academician

About B.Pharma

The growth of pharmaceutical companies has resulted from the rising demand in medicine and medical supplies across the world. As a way of contributing to this growth, the Faculty of Pharmacy offers a four year Bachelors Degree program in Pharmacy which seeks to impart within the students the fundamental of pharmaceutical medicine related science and research. The scope of this field includes the purpose of diagnosing the various causes of disease and the manner and methods through which they can be treated. Beyond merely the treatment protocols and procedure, the field of pharmacy also explores various forms of

practical research which can be utilised as a way of eradicating disease causing virus and curbing their spread for the welfare of humanity. As a way of providing the highest form of practical training to the students, the faculty of pharmacy is equipped with state of the art facilities and laboratories for research and novel innovations. The program provides a comprehensive approach to the study of pharmacy which provides a platform for the students and faculties to innovate and patent novel treatment modalities. The program curriculum explores various fundamental subjects of pharmacy which include Pharmaceuticals, Pharmacology, Pharmaceutical Chemistry and Pharmacognosy. The program goes on to develop and nurture the interpersonal skills of the students, as a way of enhancing and promoting their employability and creating more placement opportunities.

Eligibility Criteria :

- Minimum and Maximum age for admission will be 17 and 35years.
- Student shall be medically fit.

Minimum Education :

- 10+2 class passed Science (PCB) & English with aggregate of 40% marks.
- Students qualified in 10+2 Science examination or health care Science - Vocational stream ONLY conducted by National Institute of Open School with 40% marks.
